

Sum of IMDb Rating by Genre

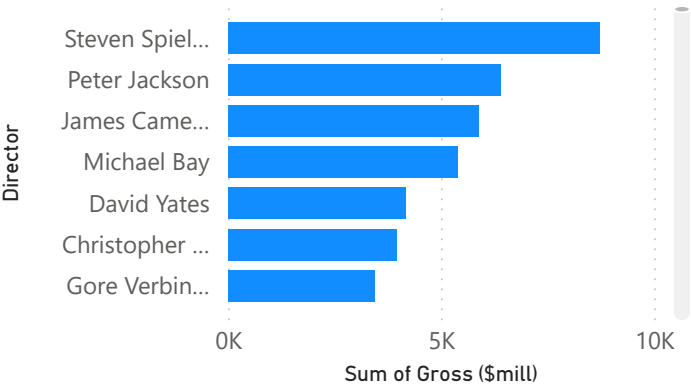

• The **Action genre** accounts for nearly **half of all IMDb ratings (49.35%)**, making it the most influential genre among the top 5. The large gap between Action and the next genres shows its widespread popularity and broad audience reach..

• **Animation (20.84%)** and **Comedy (18.46%)** together make up almost **40%** of the total ratings. This indicates that audiences also value genres that provide entertainment, creativity, and emotional connection.

• With big-budget genres like action frequently clustering at the lower end of profitability, the scatter plot demonstrates that bigger movie budgets do not always translate into higher profit percentages.

• The scatter plot shows that bigger budgets don't always lead to higher profitability, as seen in the Action genre, while lower-cost genres like Animation and Biography often achieve stronger returns on investment.

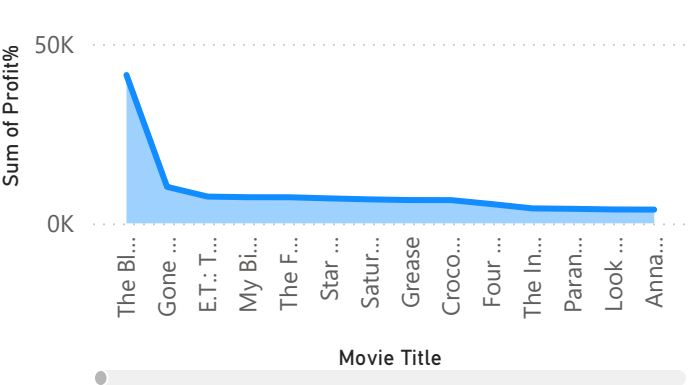

Sum of Gross (\$mill) by Director

• Outperforming the other directors on the list, **Steven Spielberg** has the highest cumulative box office gross. His films have made far more money, demonstrating his enduring influence, steady output of blockbusters, and tremendous appeal to audiences around the world.

• **James Cameron** and **Peter Jackson**, who make up the second group of top-grossing directors, are not far behind. Their comparable totals demonstrate that both have produced enormously popular franchises, such as Avatar/Titanic (Cameron) and The Lord of the Rings/The Hobbit (Jackson).

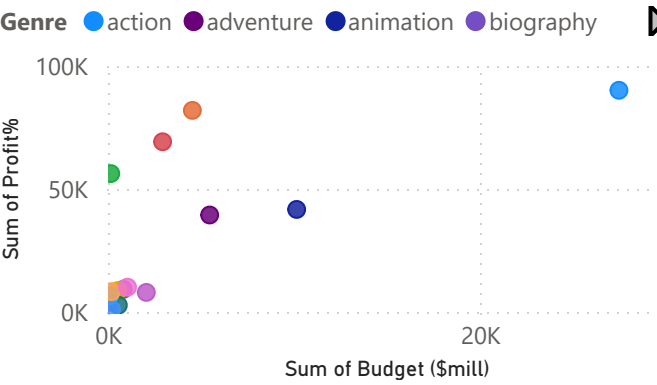

Sum of Profit% by Movie Title

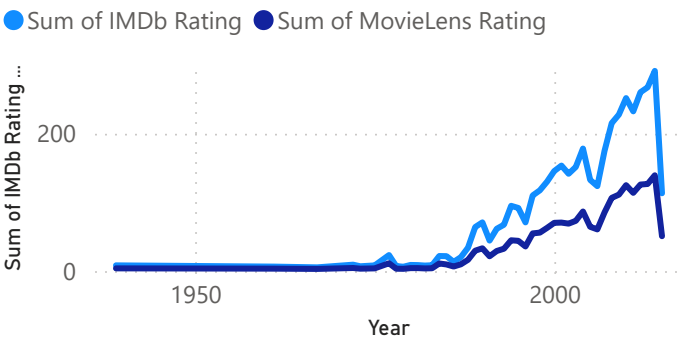

• **The Blair Witch Project** stands out. This is a result of its renownedly cheap production costs and enormous box office receipts, which make it one of the most profitable movies ever made in relation to cost.

• In contrast to the extreme outlier, the remaining titles—such as **Gone With the Wind**, **E.T.**, **My Big Fat Greek Wedding**, and **The Full Monty**—show great profitability but are far more stable and reasonable.

Sum of Budget (\$mill) and Sum of Profit% by Genre

Sum of IMDb Rating, Sum of MovieLens Rating, First Movie Title and First Genre by Year

• Movie ratings from both IMDb and MovieLens have steadily increased over the years, showing that newer films tend to receive higher overall ratings.

• IMDb ratings rise more sharply and fluctuate more than MovieLens ratings, suggesting that IMDb reflects more variable audience reactions.
